SUMMARY

Junior Full Stack Developer with practical experience in web development, REST API integration, and process automation. Worked with React/TypeScript on the front-end and C#/.NET 8 and Java on the back-end, including API testing, messaging with RabbitMQ, and containerization using Docker. Strong analytical mindset, focused on clean code and continuous improvement.

EDUCATION

03/2026 - 05/2027 | CINEL

Specialist in Information Systems Technology and Programming

01/2024 - 12/2025 | UNICID

Systems Analysis and Development

06/2024 - 12/2024 | IEPF

Programming in Python 350h

2021/2022 - ENGLISH

Private Teacher -B1

EXPERIENCE

07/2025 - 02/2026 | BR&VR

Full Stack

Developed Full Stack web solutions using Lovable and custom code (React/TypeScript front-end, C#/.NET 8 back-end). Adjusted and tested multiple web pages, integrated APIs, and resolved first-level client tickets with average resolution under 48h.

06/2025 - 07/2025 | TECHFIVEX

Intern

Development of a notification API in Java with REST architecture and documentation via Swagger. Implementation of RabbitMQ for asynchronous communication and integration with PostgreSQL. Containerization with Docker and code versioning with GitHub.

02/2025 - 05/2025 | TIME FRAME PORTUGAL

DOCUMENT VALIDATION ANALYST

Digital analysis and validation of international documents, ensuring authenticity, legal compliance, and data integrity, with a focus on information security and fraud prevention. KYC | Digital documents | Compliance and data security
